

Horse report – Envidienme

[Envidienme turf profile](#)

Name: Envidienme

Average rating: 117.1

Ranking (4y, 4 races or less):

San Isidro: 4/5893

Median BSN (all other horses): 85.8

95th percentile BSN (all other horses): 116.9

Last trainer: Diego Peña

Average Win Share: 12.6%

Ranking Premios: 17/3558

Ranking Premios per race: 234/3558

Ranking Freq. (races run per horse): 785/3558

Father: Orpen

[Orpen's history page](#)

Siblings: 659

Generations: 17

Ranking: 135/1507 (Ranking is based on the average BSN for Orpen's children vs other padrillos.)

Mother: Envidiosa Key

Win rate for Orpen's offspring vs all padrillos

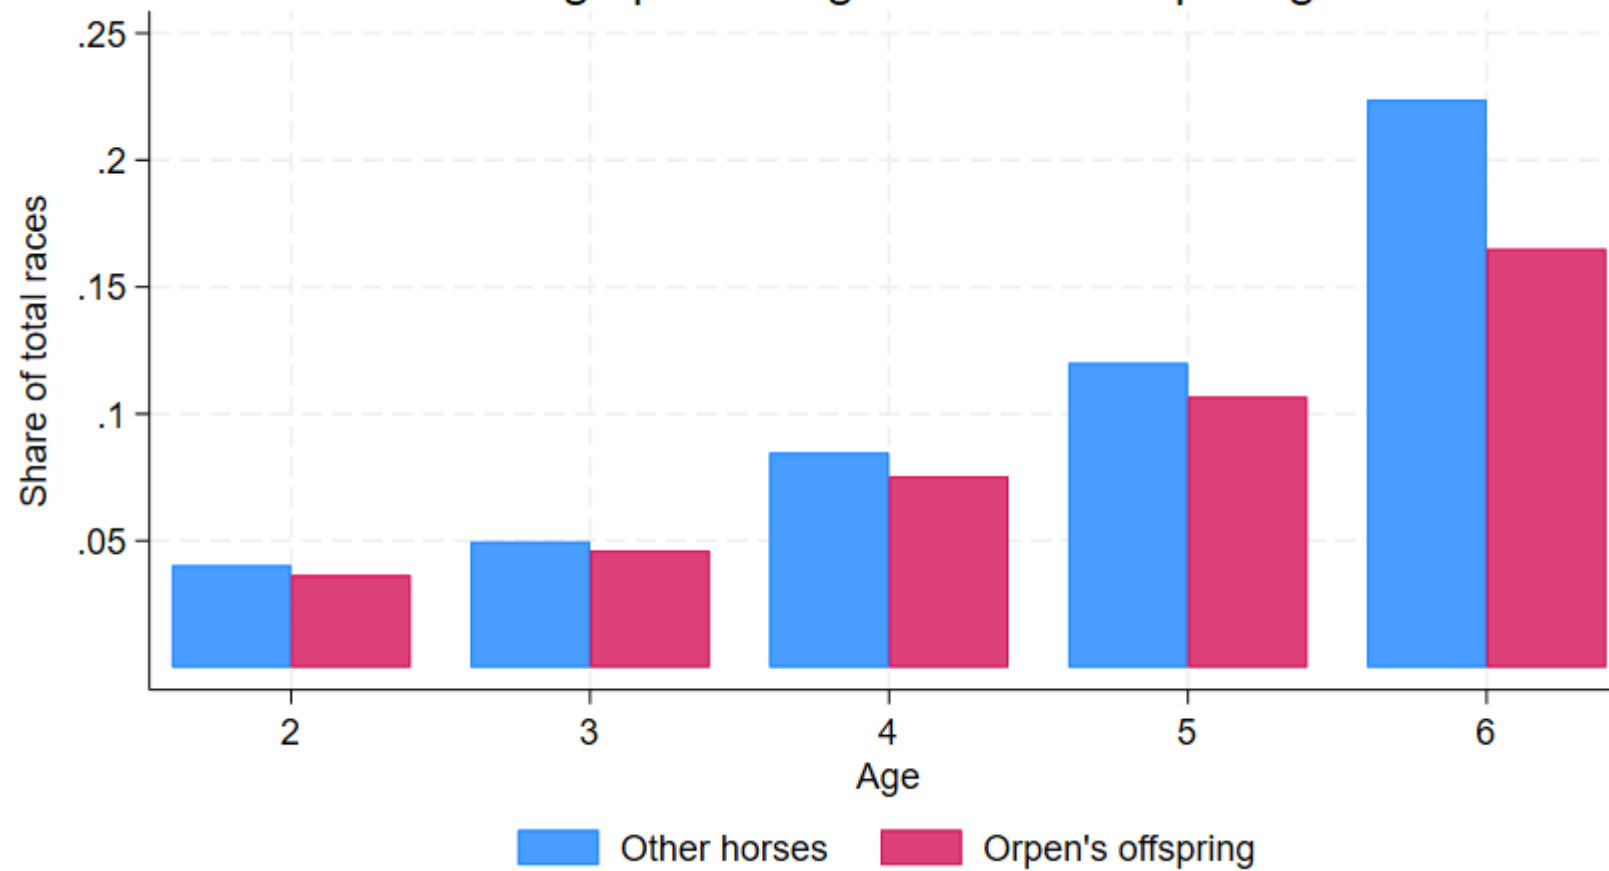

Orpen's offspring clasicos/carreras corridas by age

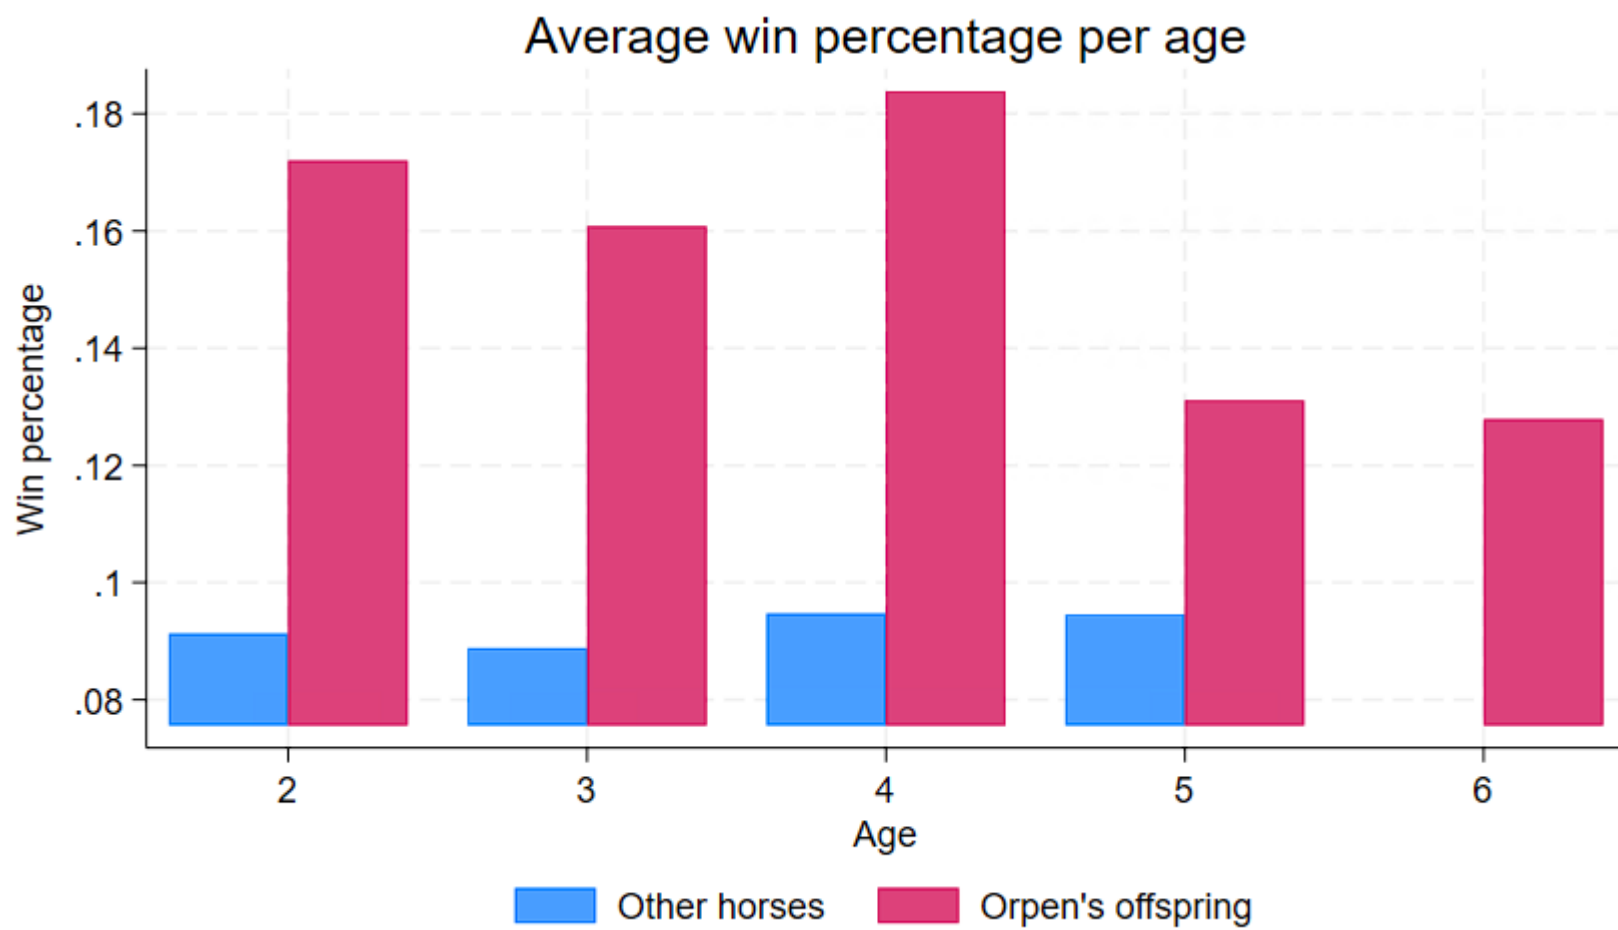

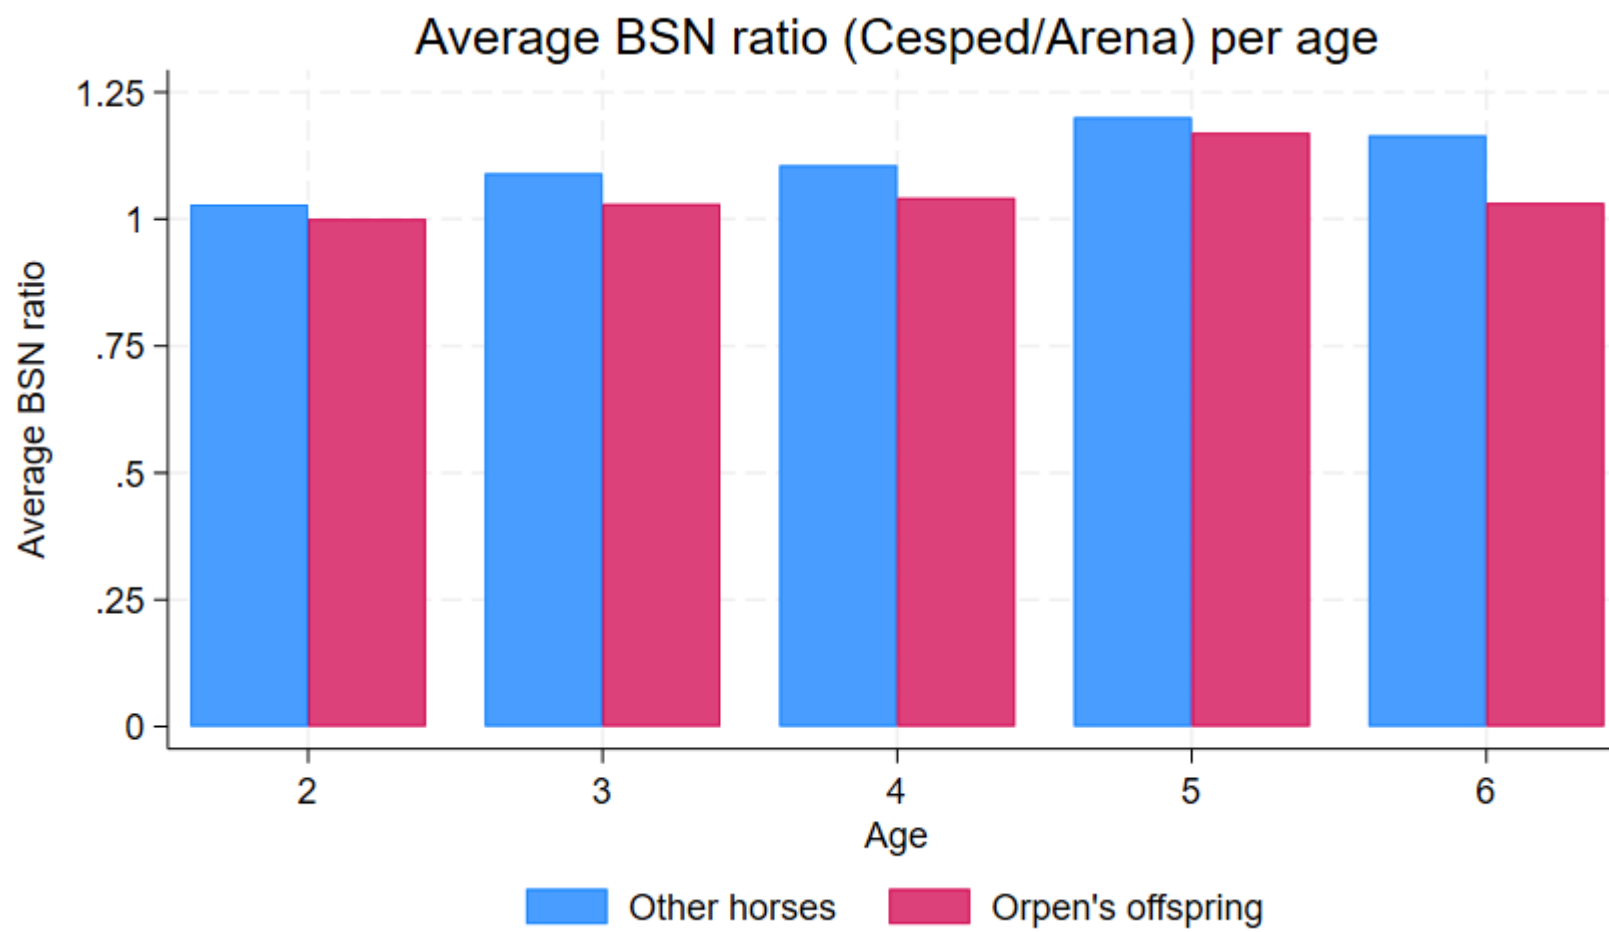

Ratio of average BSN for Orpen's
offspring vs other horses

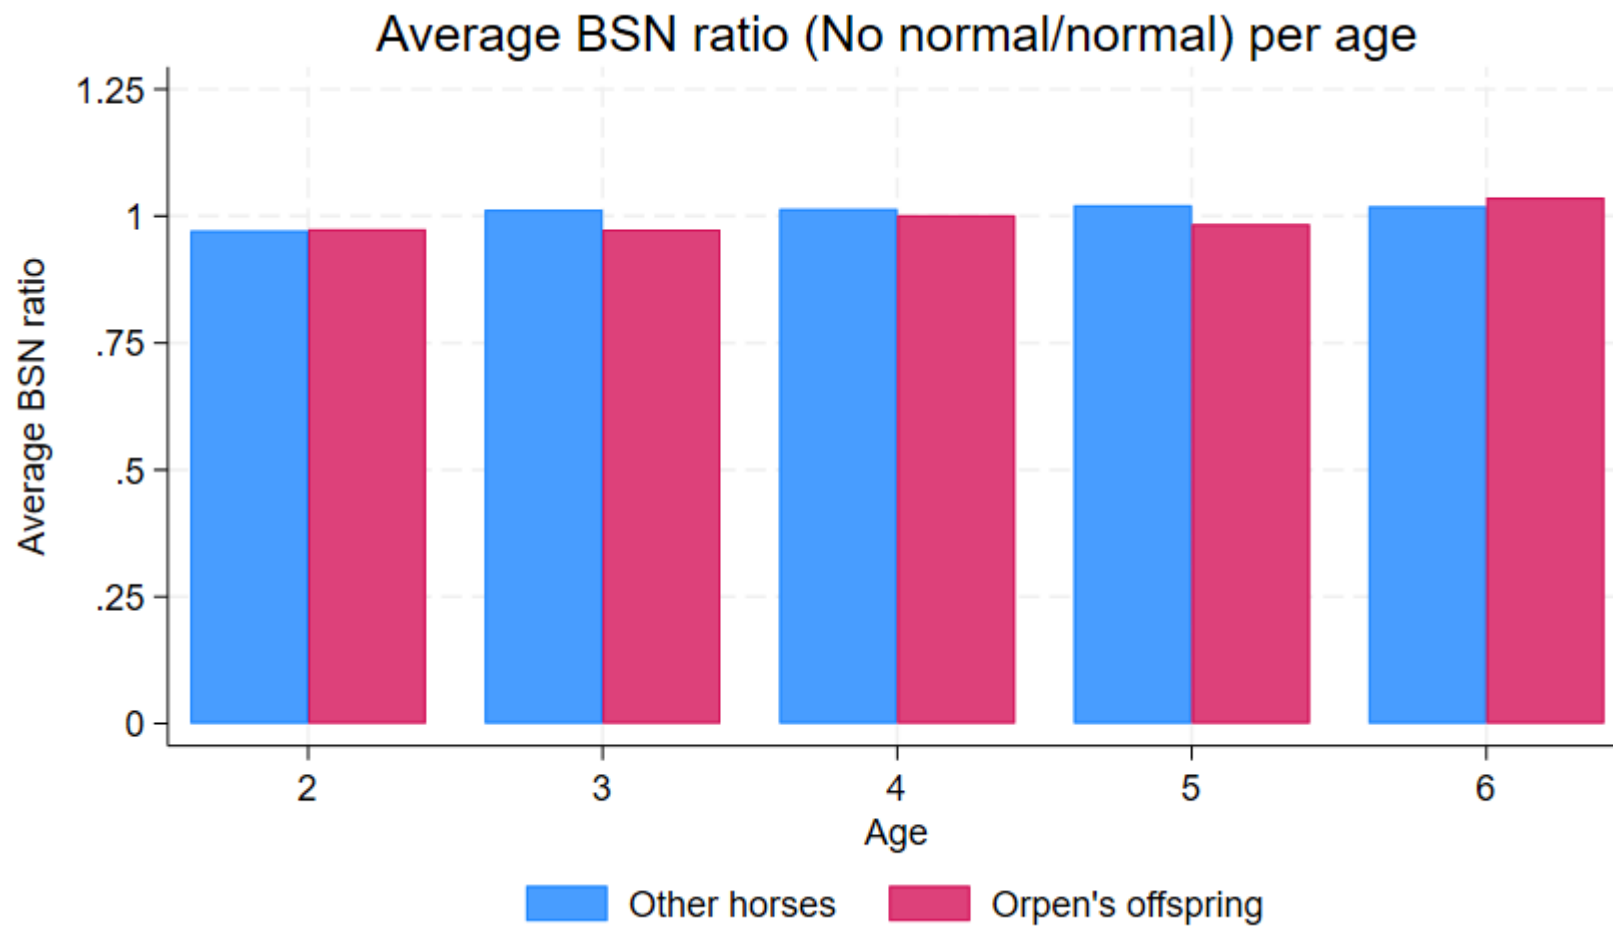

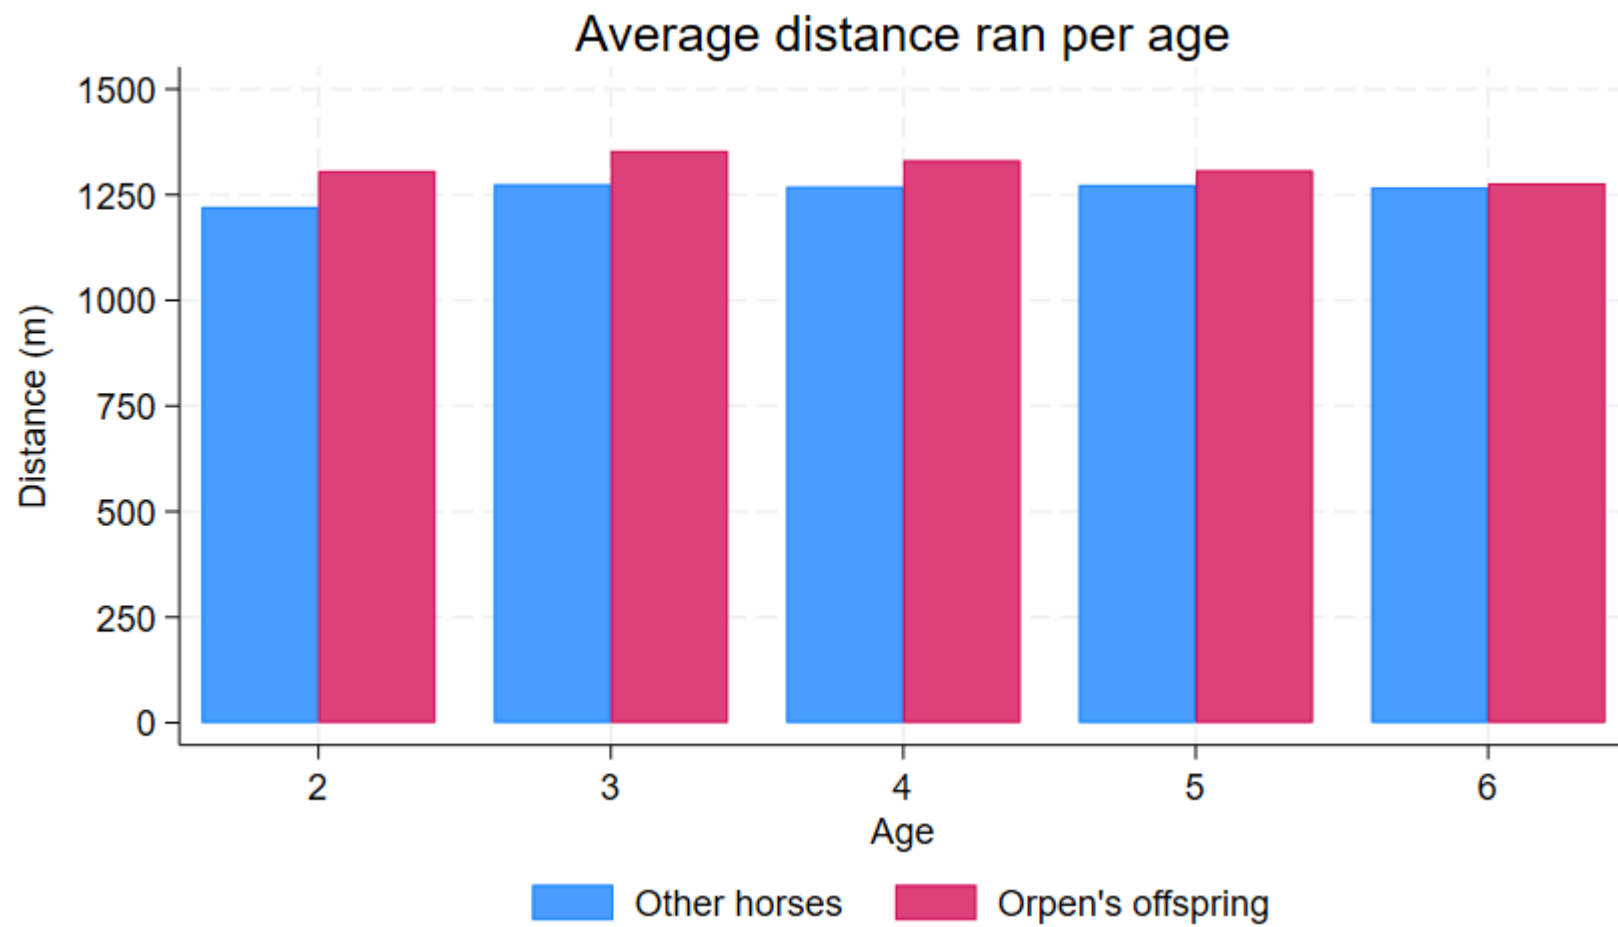

Average percentage of races ran per age

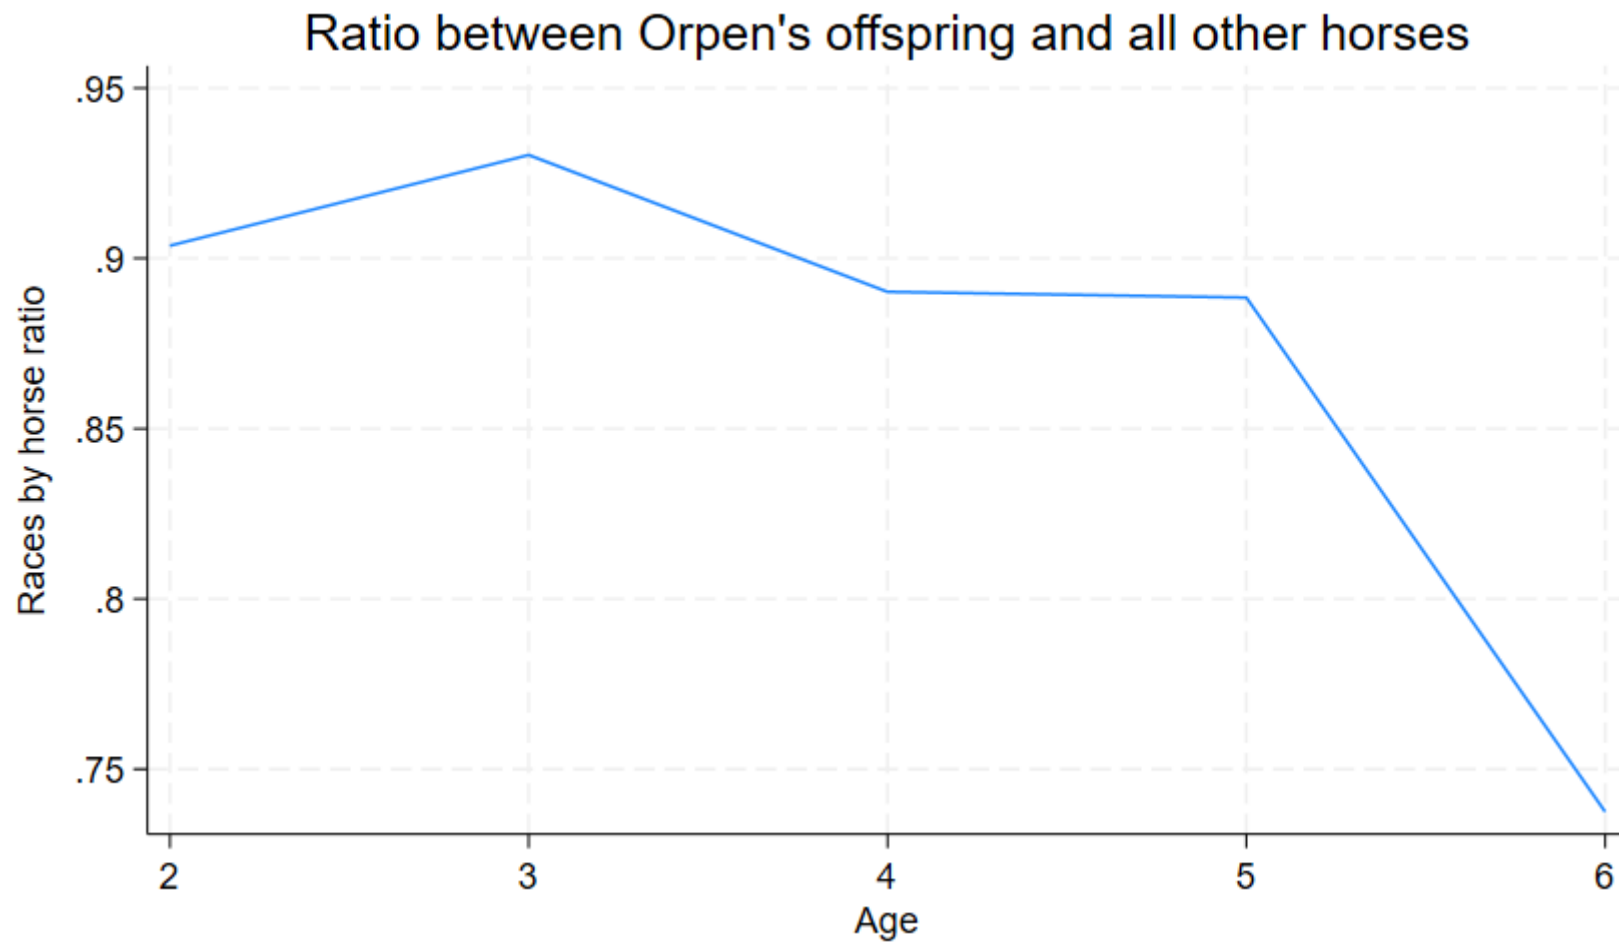

This graph shows the ratio of average number of races by horse for Orpen's offspring vs all other horses. For each horse, we calculate the number of races ran by age. We then calculate the mean number of races by age and father. Then we compute the ratio.

“id” identifies the observations corresponding to Envidienme. C1 is Envidienme’s first race, C2 their second, and so on. For races where number of wins required to participate is not specified, we calculate the median number of wins, and include races where the median is below the horse’s number of wins.

Trainer fixed effect regression

The following regression output shows the results of regressing BSNs on horse race number, and different variables related to the current trainer. It looks at all horses that Envidienme's current trainer worked with. **Sold** is a dummy variable signifying if the observations correspond to after the horse was trained by Envidienme's current trainer. **R123** is a dummy identifying the first three races after the horse was sold by Envidienme's current trainer. Likewise, **R456** is a dummy identifying the fourth, fifth, and sixth races after the horse was sold by Envidienme's current trainer. The regression includes horse fixed effects.

Linear regression, absorbing indicators
Absorbed variable: `id_ejemplar`

Distribution of BSNs in San Isidro – Cesped for 4-year-old horses in last 2 years

The dotted line marks the highest BSN obtained by Envidienme ~ 142.07 (also obtained in this track-surface); which is in the 99.71 percentile of the distribution.

This graph shows the percentage point of Servicios / Nacieron for Orpen and the Top 10 horses ([Estadísticas generales - Stud Book Argentino](#)). The data is for 2018 and 2019 as all horses had children born in these years. Orpen's offspring were born between 2005 and 2021.
